Software engineer with about four years of experience, primarily in frontend development at Meta and PayPal. Built user-facing features with TypeScript and React, improved performance, and strengthened automated tests.

EXPERIENCE

Founder & Sole Engineer

April 2026 – August 2026

Mythrun LLC (pre-launch AI product) — Seattle, WA

Multiplayer AI Dungeon Master for D&D 5e

- Built a pre-launch product with a React client, Node.js services, Postgres, Redis, and AWS; reached closed playtesting in four months
- Designed multi-model orchestration with isolated context and structured outputs; built an LLM evaluation suite that runs in CI and blocks deployment on regressions

Software Engineer

February 2025 – April 2026

Meta — Bellevue, WA

Facebook Monetization: ads-based shopping experiences in the Facebook app

- Led implementation, rollout, and analysis of an ad-format experiment across UI and server-side fetching; measured **+116% revenue and +172% conversion rate** within the experiment
- Helped implement parallel client-side ad fetching and pagination merging; contributed to reducing sessions with loads over two seconds from **over 20% to 7%**
- Built session-debugging tools and latency dashboards, plus a launch-evaluation tool **used by 14 contributors across functions**
- Contributed to daily Python batch pipelines that transformed engagement logs and selected candidate posts for downstream asynchronous feature-eligibility updates
- Documented and taught prompt-version-aware caching and LLM evaluation practices; reviewed teammates' integrations, with **utilities adopted across 3 AI projects**

Software Engineer II

July 2022 – February 2025

PayPal — San Jose, CA

Identity org: front end of PayPal's consumer login experience

- Helped migrate consumer login to TypeScript, React, and Next.js; built a reusable embedded login component adopted by other product teams
- Shipped client-side passkey and passwordless flows; the team reported a **~1% login-success gain** valued at \$80 million in 2023
- Contributed to a **50%+ page-load reduction** through server-side rendering and smaller client bundles
- Coordinated Cypress test repairs after a login outage, restored a passing suite with teammates, and established testing expectations for new flows

EDUCATION

B.S. Computer Science (Not Completed)

2018 – 2022

Oregon State University, School of Engineering (AI focus)

Completed 90% of coursework before leaving for a full-time offer; degree not conferred. Coursework: Algorithms, Databases, Machine Learning & Data Mining

SKILLS

Languages: TypeScript/JavaScript, Python, C++, PHP, Objective-C, SQL

Frameworks & Tools: React, Next.js, Node.js, GraphQL, Postgres, Redis, AWS, Cypress, Claude Code

Distinctions: ICPC 2020 (1st in Oregon) • Google Hash Code 2020 (top 7% internationally)
